Foreword

THIS new Princeton Handbook has been carefully revised so that our customers may have a complete and accurate listing of Princeton Products. We offer a wide range of varieties and sizes of hardy, woody material for all types of landscape work. Both the Landscape Architect and the home owner have found this catalogue a valuable handbook and a source of dependable information.

The stock is expertly grown and carefully handled with a minimum of exposure so as to insure the best planting results. All orders are freshly dug and the plants consequently are not injured by storage.

We wish to emphasize the fact that the material offered is Princeton grown in our own nursery consisting of over 1,000 acres. We mention this because very few firms can offer such a large assortment of their own grown material or stock which has been so carefully maintained in good condition.

Also, we call your attention to our ability to quote on large complete lists because of the comprehensiveness of our inventory.

WM. FLEMER, JR.
President

How to Reach Princeton Nurseries by Auto or Train

We are located midway between New York and Philadelphia. Both the Lincoln Highway and the new Super-Highway (Route 26) pass our nurseries.

The office of Princeton Nurseries is located on Lake Road, in the town of Kingston, New Jersey.

The nearest railroad stations are at Princeton and Princeton Junction. Phone Princeton 1776 or 1777 and we will be glad to come and meet you at either place.

The New York-Washington planes pass over our nursery hourly. When travelling by airplane, watch out for the interesting block arrangement from the air.

We would call your attention to the fact that we have one of the largest nurseries in the country with over 1000 acres of nursery stock. We are growing between 1100-1200 varieties of hardy woody ornamentals.

A cordial invitation is hereby given to visit our nursery at any time.

Prices, Etc.

Prices are f.o.b. Kingston, N.J., and no boxing or packing charges will be made for stock in full carload lots.

Packing charges are at cost and represent the actual cost of the material used in the operation.

Should any article be desired balled and burlapped, which is not so designated in the catalogue, there will be the following scale of charges.

2-3', 15c 3-4', 20c 4-5', 30c 5-6', 40c 6-8', 60c 8-10', 75c

Larger sizes would be charged in proportion. In all instances where varieties are marked B. & B. after the item, these charges are included in the printed price.

We recommend that all varieties marked with an asterisk (*) be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way.

Reservations of specimen plants. For an additional 25% of the cost of each item, customers will be permitted to select and reserve specimen plants in the nursery rows.

We reserve the right to reject orders which call for unusual items only. We expect that a reasonable quantity of the commoner items will be included in your order. This compensates in part for the high cost of producing varieties that others do not grow because they are too difficult or unprofitable.

Terms

Cash before shipment is required from parties unknown to us. An order accompanied by a cash payment is subject to a discount of 2% from the total amount of the order.

Liability and Claims

We are not liable for injury to stock from frost, hail, fire or other causes beyond our control.

We will in no way be responsible for productiveness of stock after the material has been satisfactorily received by the purchaser.

We will send out healthy, thrifty stock, true to name. If proper proof is advanced, we will gladly replace any not found true to name.

Under no circumstances would we be liable for a greater amount than the sum originally paid us for the stock.

Errors made by us will be gladly corrected, but complaints must be made within ten days after receipt of stock.

Plants become your property upon delivery to transportation company and we cannot be responsible for loss, damage, or delay in transit.

All orders booked are based on the distinct understanding that the purchaser agrees to the condition of sales as stated above.

Notes in Explanation of Catalogue

The figures following each variety indicate in feet the approximate height of that plant in maturity. Ample allowance has been made for the many physical factors that tend to modify the growth of plants in cultivation.

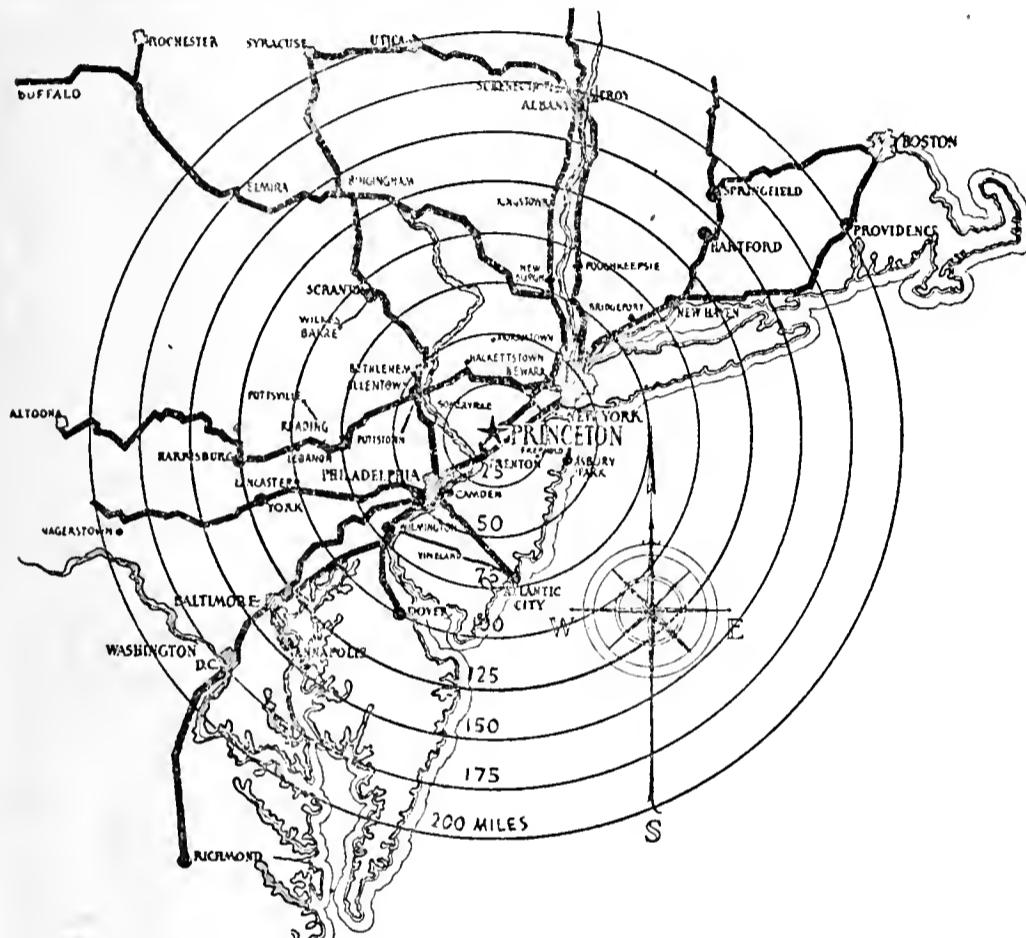

The botanical and common names are taken from "Standardized Plant Names," which is the accepted authority on plant nomenclature in the horticultural industry.

Our standard of grading all plants is based on a formula which has been adopted by the American Association of Nurserymen.

Quantities of 5, 25, and 250 will be sold at the ten, hundred, and thousand rates respectively.

BERBERIS**NEW HARDY EVERGREEN TYPES**

We have a good assortment of these new varieties which are very attractive in both dark green, holly-like foliage and showy flowers. We consider this class of stock one of the most valuable additions to the broad-leaved evergreens. As a class nearly all have large thorns, spined leaves, and color beautifully in the winter months. Under favorable conditions most of them will attain a height of about six feet.

gagnepaini. Has long and very narrow, holly-like leaf.

JAPANESE CHERRIES

We offer the following list of the choicest imported varieties. These are of upright habit and very desirable for landscape work. In addition to the list named we have lesser quantities of several other varieties as well as some larger sizes which we will be glad to quote on request. All of our cherries are eastern grown. They are heavy, well branched, well rooted specimens not to be compared with light one or two year whips.

**FRENCH LILACS—NAMED VARIETIES
ALL ON OWN ROOTS**

These are all grown from cuttings and are on their OWN ROOTS, which is the best method of propagation. The resulting plant is more permanent than the grafted stock commonly offered. We specialize in named Lilacs and are able to offer these superior grown plants at prices that compare favorably with inferior grafted stock. These named Lilacs generally grow from 6 to 12 ft. in height, depending on the variety and locality.

Planting Notes on Native Plant Materials

MANY of our friends have told us that they have used the Princeton Nurseries catalogue as a planting guide and text-book. We accept this as a great compliment to have published a trade handbook which may be serving a useful purpose.

One of the yearly features of our catalogue has been the space allotted for Special Planting Lists. These planting guides have materialized as the demand has been created for a more accurate knowledge of the use of plant materials.

In the past twenty years, due in part to extensive park developments, we have seen an increasing use of native American plant materials. Princeton Nurseries have realized this growing demand and are now able to offer in great quantities and in various sizes, over 150 varieties of hardy native woody trees, shrubs and vines.

To better appreciate the more intelligent use of native types and avoid unnatural plantings, it is quite desirable to group these native types according to the way they associate with one another in their natural environment. The various plant groups are influenced by definite environmental factors. The native plant is more or less confined to the most suitable location by its ability to adapt itself. Conditions are ever changing in the life of plants growing in the open pasture or in the virgin forest.

It might be safely stated that all plantings of native material are more harmonious and congenial if plant types are used together which are found associated together in nature.

In presenting the following types, it is well realized that if space would permit, it would be better to sub-divide each type into smaller groups. We are placing them under four general headings as follows:

- A—The Field and Pasture Type.
- B—The Lowland and Swamp Type.
- C—The Forest Type.
- D—The Seaside Type.

A

The Field and Pasture Type

TREES:

Betula populifolia

Juniperus virginiana

SHRUBS and VINES:

Ampelopsis quinquefolia

Rhus typhina

Celastrus scandens

Robinia hispida

Cornus paniculata

Rosa blanda

Corylus americana

Spiraea latifolia

Juniperus communis

Spiraea tomentosa

Lyonia ligustrina

Viburnum cassanoides

Myrica carolinensis

Viburnum dentatum

Potentilla fruticosa

Viburnum lentago

Rhus copallina

Viburnum prunifolium

Rhus glabra

Vitis aestivalis

B

The Lowland and Swamp Type

TREES:

Acer negundo

Crataegus crus-galli

Acer rubrum

Fraxinus americana

Acer saccharum

Juglans nigra

Celtis occidentalis

Liquidamber styraciflua

Nyssa sylvatica
Ostrya virginiana
Platanus occidentalis
Quercus bicolor

SHRUBS:

Alnus rugosa
Amelanchier canadensis
Ampelopsis quinquefolia
Aronia arbutifolia
Aronia melanocarpa
Azalea viscosa
Benzoin aestivale
Carpinus caroliniana
Cephalanthus occidentalis
Clethra alnifolia
Cornus amomum
Cornus stolonifera
Hamamelis virginiana
Ilex verticillata

Quercus macrocarpa
Quercus palustris
Tilia americana
Ulmus americana

Lyonia ligustrina
Physocarpus opulifolius
Potentilla fruticosa
Rosa lucida
Rosa palustris
Salix discolor
Sambucus canadensis
Spiraea latifolia
Spiraea tomentosa
Vaccinium corymbosum
Viburnum acerifolium
Viburnum dentatum
Viburnum lentago

*C**The Forest Type**TREES:*

Acer pennsylvanicum
Acer saccharum
Acer spicatum
Betula lenta
Betula lutea
Cornus florida
Fagus americana
Liriodendron tulipifera
Ostrya virginiana
Pinus resinosa
Pinus rigida

Pinus strobus
Prunus serotina
Quercus alba
Quercus coccinea
Quercus prinus
Quercus rubra
Quercus velutina
Sassafras officinale
Tilia americana
Tsuga canadensis

SHRUBS:

Amelanchier canadensis
Azalea nudiflora
Ceanothus americanus
Cornus alternifolia
Hamamelis virginiana
Ilex verticillata

Kalmia latifolia
Rhododendron maximum
Rosa setigera
Rubus odoratus
Viburnum acerifolium
Viburnum lantana

*D**The Seaside Type**TREES:*

Betula populifolia
Juniperus virginiana
Liquidamber styraciflua
Nyssa sylvatica
Pinus rigida
Prunus serotina
Quercus alba

Quercus coccinea
Quercus phellos
Quercus prinus
Quercus rubra
Quercus velutina
Sassafras officinale

SHRUBS:

Amelanchier canadensis
Ampelopsis quinquefolia
Aronia arbutifolia var.
atropurpurea
Aronia melanocarpa
Ceanothus americanus

Clethra alnifolia
Comptonia asplenifolia
Corylus americana
Ilex glabra
Ilex opaca
Myrica carolinensis
